

# WIDAL TEST REPORT (TYPHOID SEROLOGY)

Patient Name:	Priya Singh
Age:	32 years
Test Date:	29/11/2025
Clinical Symptoms:	Prolonged Fever, Headache, Abdominal Pain

## Test Results:

Antigen	Titer	Result	Interpretation
O Antigen (TO Ag)	1:160	POSITIVE	Suggestive of acute typhoid
H Antigen (TH Ag)	1:320	POSITIVE	Suggestive of acute typhoid
AH Antigen (TAH Ag)	Negative	NEGATIVE	No paratyphoid
BH Antigen (TBH Ag)	Negative	NEGATIVE	No paratyphoid B

**Clinical Recommendation:** Widal test shows positive titers suggestive of active typhoid fever. Recommend blood culture confirmation and start fluoroquinolone or cephalosporin therapy.
